Medication Supply Update

Pharmacy Bulletin

04-004

The manufacturer of Prilosec OTC, Procter and Gamble, is having difficulty keeping up with the demand for their product. According to the manufacturer this is a temporary situation that is anticipated to last only a few months. In the mean time, if you do not have **ANY** Prilosec OTC or are unable to obtain any from your warehouse or wholesaler, you may call the ACS Prior Authorization Help Desk at 1-866-556-9320 for an override. On a case by case basis, ACS will allow an override for the use of omeprazole 20mg during the current Prilosec OTC shortage.

If you have any further questions you can call ACS at the number above or the Wyoming Department of Health Pharmacy Unit at 1-800-438-5785.

Sincerely,

Antoinette Brown, R.Ph.
Medicaid Pharmacist
